

AUTOMATED TEST REPORTS

INSTANT, ACCURATE, ACCESSIBLE SCALE DATA

Fairbanks Scales is deeply committed to reporting commercial scale test results as accurately and quickly as possible. Thanks to today's technologies, fulfilling this commitment has never been easier.

Equipped with a tablet and Fairbanks proprietary Microsoft® Test Report App, our field technicians are able to complete compliance tests and share automated results while onsite. Test reports are instantly emailed to a designated customer inbox and submitted electronically to local weights and measures authorities in states that accept online submissions.

Automated reporting is available for all categories of commercial scale equipment including truck, rail, bench, floor and in-motion systems.

Here are some other automated reporting features and benefits:

- NIST Handbook 44 tolerances are built-in to the Fairbanks Test Report App, eliminating potential data input errors.
- Customer equipment specifications are loaded into the app for consistency in subsequent testing.
- Fairbanks customers receive FREE secure online access to test reports, equipment asset lists, downloadable data points, scale images, and weights and measures traceable standards.

To request a commercial scale test and receive the benefits of Automated Test Reports, contact your local Fairbanks representative or be connected to your local Fairbanks Service Center by calling:

1-800-332-1123

Customers can also request commercial scale testing at:
